

CYPHER Learning
**ACCELERATED
DEVELOPMENT
SERVICES**

Our accelerated development service provides you with dedicated engineering hours focused on delivering the customizations and enhancements that are most impactful for your business. While remaining aligned with our CYPHER platform development strategy, these dedicated engineering hours prioritizes your unique requirements, fast-tracking solutions to ensure you gain maximum value from our platform.

Accelerated development benefits

Prioritized feature delivery

Understand and expedite the development of your high-priority features within our roadmap, ensuring they're delivered on a timeline that meets your business needs.

Custom adaptations

Implement customizations that fit seamlessly into your workflows, adapting features to better support your specific goals while maintaining compatibility with our broader platform evolution.

Engineering subject matter experts (SMEs)

Access expert-level engineering resources tailored to your needs. Rather than assigning a single engineer, we ensure you connect with the most relevant expert.

Dedicated technical support

Address unique technical support needs that require engineering expertise, resolving complex issues efficiently to minimize disruptions.

Benefits for your team

Accelerated value delivery

Gain access to essential features and adjustments faster, enabling you to stay agile and responsive without sacrificing strategic alignment.

Focused expertise at your fingertips

Leverage dedicated engineering hours tailored to your needs, empowering your team to achieve its goals with customized support.

With our accelerated development service, you benefit from a faster, more responsive development approach that's aligned with our shared objectives, making the most impact for your goals.
